Pharmacy Awareness Week

It is that time of the year again and **Pharmacist Awareness Week** is upon us! As medication experts, Pharmacy Staff collaborate with all other health care providers to better the health of our patients through not only medication education but also so much more. With the new expanded scope of practice in Ontario, staff are able to provide emergency prescription refills, renew/extend prescriptions, change drug dosage/formulations, initiate prescription therapy for smoking cessation and administer a drug by injection. Presently the profession is going through many changes and we want to help colleagues understand how this contributes to our health care organization. Our theme this year is: *Providing more health care than you know: Ask a pharmacist*. So come on down by the cafeteria this week at the Met Campus to learn more about your Pharmacy Team and what we can do together to help better the care for our patients!
