

Hello Everyone:

Hope everyone is enjoying this spring weather as much as we are! Can't help but wonder if the Spring Fling Huddle last Friday had something to do with it!. Thanks to

Thanks to everyone for joining us at last week's Spring Fling Huddle.

everyone who stopped by to the huddles and shared in some delicious spring-themed goodies. A special thanks to Marie Booze, from the OR Scheduling Project, who worked diligently to prepare the treats and bring everyone a touch of spring. Well done!

For the past couple of weeks the Cath Lab group has been collecting information related to how the patients flow through the lab. We have been performing time studies to help us understand this better. The information that we are collecting will help the staff develop standardized ways of working and result in improved patient flow.

Save the Date!

Today we are asking you to hold the date for another celebration we are planning. On April 10th at 11am and 1pm we are hosting the Wave 1 "Valedictory Huddle" celebrations. We will be reflecting on all of the amazing achievements to date, and bring back our most important team members - our patients - who will share their feedback on what it was like being part of the experience and how well they think we have used their insights to achieve our goals of standardization and optimization. This celebration does not indicate an end to the Wave 1 projects, rather a transition to the next level, as we get ready to launch another set of projects. Stay tune for more information about these projects and the "Valedictory Huddle."

Have a great weekend!

The SOP Team
