Testing New Care Round Boards

The Surgical Inpatient team is looking for your feedback on the new Care Round boards that are being tested now until October 15. We have installed a physical whiteboard on 6E at WRO and an electronic spreadsheet format on 8N at WRM. During the test phase we invite all surgical and medical staff to come and take a look and provide feedback. There is a feedback box located on each test unit by the board or you can send comments via email to:

- Rachel Twohey Rachel.Twohey@KMandT.com or,
- Tara-Ann Glasgow Tara-Ann.Glasgow@wrh.on.ca

Med Fluid Success

September is the 3rd month this year that we have had no patients harmed from medication administration! The last time we achieved this goal was in April.

We would also like to acknowledge the efforts of staff through maintenance of patient armbands. This brings our compliance from 92% at the end of 2014, up to 99% or greater since June 2015! The Med Fluid project team continues to work with front line staff with the goal of maintaining a harm free medication process.

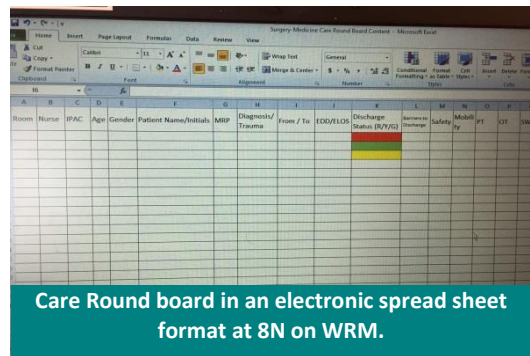

Local news coverage

Last Saturday the Windsor Star ran an article highlighting the strain currently on our MRI resources to keep pace with the increasing demand for this invaluable diagnostic service. Brian Cross of the Windsor Star did highlight that our MRI group is doing impressive work here and that we are one of the top performing hospitals in our LHIN.
