STATEMENT REGARDING CANCER CENTRE PATIENT TREATMENT AT WRH

Windsor Regional Hospital (WRH) has been working with IT experts and radiation treatment platform providers on trying to implement a safe and reliable service to operate the radiation machines while we are addressing global IT issues caused by the cyberattack. In the meantime, WRH is working with Ontario Health and other cancer centre organizations to transfer patients' current care and address any new referrals for radiation care.

In parallel, patients requiring systemic (chemotherapy and related services) are being treated both within WRH and plans are established to access additional capacity in other centres.

WRH fully appreciates the stress this is causing to our patients and we are trying our best to accommodate their current clinical needs while working on an immediate solution. Financial support is available for travel and accommodation costs.
