iPHIS = integrated Public Health Information System; PHO = Public Health Ontario; NOC = COVID19 Provincial Diagnostic Network Operations Centre; CCSO = Critical Care Services Ontario; dBCS = Daily Bed Census; CRCI = COVID-Related Critical Illness (COVID-Related Critical Illness (CRCI) is defined as: Admission to the ICU because of a clinical syndrome consistent with COVID, AND the patient has had a positive test that is consistent with acute COVID illness. COVID+ is a sub-set of CRCI patients whose last COVID test was positive.)

*Mode of acquisition is identified following the public health investigation and may not be available at the time the case is reported. Reported numbers should not be interpreted as mode of acquisition for the previous day's case count. The mode of acquisition is updated twice per week.

**Effective reproduction number (Rt) is updated twice weekly and not daily. Rt is not calculated for PHU Regions with case counts < 12 over the reporting period.

Update :

- The Ontario government [announced](#) the introduction of proposed legislation that, if passed, would give the province the necessary flexibility to address the ongoing risks and effects of the COVID-19 outbreak. *The Reopening Ontario (A Flexible Response to COVID-19) Act, 2020* would, if passed, ensure important measures remain in place to address the threat of COVID-19 once the provincial declaration of emergency has ended. The proposed legislation is part of the government's plan for the continued safe and gradual reopening of the province once the declaration of emergency ends.
