

Memo from Infection Prevention & Control to ALL Staff

Date: March 25, 2020

We recognize that the community wants to support all of us for the work we are doing. They do so in many forms. One is to have food delivered to the hospital for staff.

In order to ensure safe infection control practices, we are asking you to support informing the community that we cannot accept items like pizzas or shared plates of food. The risk of spreading infection is too great. Individually wrapped meals/sandwiches are acceptable.

Also, at this time, if you are called, feel free to suggest the food is delivered to organizations such as the Downtown Mission. At a time like this, donations to the Mission are struggling and we need to support those in need. Please call public relations and they can help facilitate the delivery.
